

# ICE OUT GEORGIA!

## PRINCIPLES

### **We are human-centered.**

We oppose the criminalization of immigration and the detention and deportation of immigrants of all genders, ages, and abilities: women and children, jobless queers and disabled elderly, domestic workers and day laborers, and everyone else.

**We are against ICE jails everywhere.** This means we do not want new ICE jails in Social Circle, Oakwood, or anywhere else in GA, for private profits, political gain, or any other reason.

### **We keep us safe!**

We do not cooperate with police's request for information about the movement or fellow activists.

# WELCOME TO THE MOVEMENT

### **Who are we?**

**ICE OUT GEORGIA** is a movement to stop the proposed new ICE warehouses, get ICE out of Georgia, and, ultimately, off all US streets.

You are invited to join the movement by acting, wherever you are, to stop ICE.

The movement is those who participate.

**Here is what we know:** The Trump administration plans to deport 1 million people a year. To meet their goal, they are building a network of warehouses across the US, hiring record numbers of immigration cops, and invading our neighborhoods, towns, and cities. While this is a significant escalation in the war against Black, Brown, Arab, Asian, and other racialized peoples, the war did not begin with Trump. Biden and Obama were the chief deporters, and if given the opportunity, Hillary Clinton and Kamala Harris would have shamelessly followed suit. The escalation by the Trump administration only highlights what has long been true: the US empire, founded on genocide and slavery, is propped up by a colonial racial capitalist order that treats some human beings as expendable.

**Here is what we've seen:** People everywhere are fighting back. From LA to Chicago, Minneapolis to Burlington, people are organizing at the scale of the block, the neighborhood, and the city to directly repel ICE, refusing them unfettered access to carry out kidnappings. We are inspired by these fights and by the George Floyd Rebellion, the Stop Cop City Movement, the Palestinian liberation movement, and other struggles for liberation around the world. We know that another world is possible: we see glimpses of it during riots when looted goods are redistributed freely, when we listen to children so clearly articulate the injustice in our world, when we read about the Zapatistas and Rojava, when we conspire together over shared meals, when we read each other's poetry or look in each other's eyes, when we dream.

**Here is what we dream of:** A world without ICE, without police, without borders, wars, profits, or presidents.

**We refuse calls to be sensible** if sensibility means complacency amid violence. We will not allow our neighbors to be kidnapped, and we will not go back to business as usual.

**Nobody is free until we're all free.**

**Welcome to the Movement.**
